The North America Hazardous Materials Management Association (NAHMMA) is a professional organization established in November of 1993, dedicated to pollution prevention and reducing the hazardous constituents entering municipal waste streams from entities that may be exempt from regulations. NAHMMA unites the diverse entities that influence or have an interest in hazardous components of municipal waste streams (product manufacturers, government regulators, provincial, state and local waste management programs, waste handling businesses, non-profit environmental organizations) in an active, engaging association that promotes information sharing and cooperative problem solving. NAHMMA has nine local Chapters across the US (Minnesota being one of them). NAHMMA strives to build consensus and foster public/private cooperation.
